

About the Offshore Wind Energy MBA

This international MBA program is focused on management qualification of the offshore wind energy industry in the North Sea region. All modules focus on industry challenges and are conducted by highly qualified academic teachers as well as industry experts directly from the Offshore Wind sector. The MBA is accredited by AQAS.

You can start the MBA program with any module as far as places are available. You as well book a single module.

Participants study part-time alongside a full-time job in the offshore wind industry.

Admissions and Entry Requirements

To be a successful applicant of the Offshore Wind Energy MBA program, the candidate is already a professional with relevant work experience. Each application is considered individually and we welcome qualifications from various backgrounds.

The formal criteria is a bachelor or other equivalent degree combined with two years' work experience. If applicants do not meet these criteria, they may still be considered to participate in a module if they can demonstrate other capabilities or relevant professional qualifications e.g. more than 5 years' business experience in the industry. However, they cannot graduate with the MBA degree.

The Offshore Wind Energy MBA is an English-taught program and the modules are highly interactive. Candidates must show proficiency in English to successfully participate in the modules and go through extensive pre-reading.

INFORMATION

Offered in different locations in the North Sea Region.

All modules are conducted in English and require face-to-face participation in the workshops.

Developed and supported by advisory boards in Germany, Denmark, and the Netherlands.

€ 2000 per module
€ 20000 for the complete MBA

Modules can be booked individually or compiled to a an MBA degree.

Dates of the modules can be found at www.owemba.com

MODULE IV

INNOVATIVE PROJECT MANAGEMENT

Program Description

The course aims at giving the students the ability to adapt project planning to a specific environment, to cope with different methods of project management, when staff from different companies cooperates, and to integrate flexibility needed offshore and reliability required in establishing a wind farm and ensuring its operations.

By bringing in innovative thinking in project planning and realization a project model tailored for the firm can be established between the outer ends of the traditional project management theory, e.g. water fall models and adaptive project management. The module combines the aspects of innovation and HRM to make project management a leadership tool.

Lecturer

Prof. Dr. Holger Lange from University of Applied Sciences Bremerhaven is an expert in project Management. He is founder and CEO of P.E. Concepts GmbH.

He will be accompanied by Niels Bjært, who has broad experience from the offshore wind business from projects like Danish Kriegers Flak, Sandbank in Germany, Westermeerwind in Holland and London Array.

Empirical cases will be provided by participating company representatives, who will exemplify theory through real-life collaboration innovation.

Module Structure

- **Module developed in collaboration with experts**

Representing both large and small medium sized companies from the offshore wind industry.

- **Professional application**

Real-life business case-based teaching

- **Flexibility**

2 x two-days-workshop and self-study before and between the workshops

Practical Details

Two face-to-face workshops with participants from all over Europe working in the Offshore Wind Industry will be conducted in Bremerhaven.

Information about the registration deadline and the dates of the workshops are available at <https://owemba.com/information/>
