

About the Offshore Wind Energy MBA

This international MBA program is focused on management qualification of the offshore wind energy industry in the North Sea region. All modules focus on industry challenges and are conducted by highly qualified academic teachers as well as industry experts directly from the Offshore Wind sector. The MBA is accredited by AQAS.

You can start the MBA program with any module as far as places are available. You as well book a single module.

Participants study part-time alongside a full-time job in the offshore wind industry.

Admissions and Entry Requirements

To be a successful applicant of the Offshore Wind Energy MBA program, the candidate is already a professional with relevant work experience. Each application is considered individually and we welcome qualifications from various backgrounds.

The formal criteria are a bachelor or other equivalent degree combined with two years' work experience. If applicants do not meet these criteria, they may still be considered to participate in a module if they can demonstrate other capabilities or relevant professional qualifications e.g. more than 5 years' business experience in the industry. However, they cannot graduate with the MBA degree.

The Offshore Wind Energy MBA is an English-taught program and the modules are highly interactive. Candidates must show proficiency in English to successfully participate in the modules and go through extensive pre-reading.

INFORMATION

Offered in different locations in the North Sea Region.

All modules are conducted in English and require face-to-face participation in the workshops.

Developed and supported by advisory boards in Germany, Denmark, and the Netherlands.

€ 2000 per module
€ 20000 for the complete MBA

Modules can be booked individually or compiled to an MBA degree.

Dates of the modules can be found at www.owemba.com

MODULE VIII

LOGISTICS AND SUPPLY CHAIN MANAGEMENT

Program Description

This course aims at providing a consistent background of how companies in the offshore wind energy sector plan, organize and execute their logistics and manage complex, manifold industry supply chains. Several logistics and supply chain risk management measures have to be considered and implemented especially for Offshore heavy lift operations and transport of project cargo. In parallel, new market developments with growing technical requirements are demanding innovative solutions and equipment for bottom-fixed & floating wind farms.

Based on industry examples this module will introduce participants to concepts, methods and tools to improve their capacity to manage relevant logistics activities from a successful early project development stage to the operations phase.

Lecturer

Lars Engelmann is an experienced lecturer within offshore wind and project management. His professional background from management positions at Siemens and Vattenfall have always been focused on successful multinational collaboration, particularly in logistics and supply chain management.

He will be accompanied by Thore Schreiber, who is a senior project manager at Rhenus Offshore Logistics and responsible for the whole portfolio of logistics activities required to fulfill customers' needs regarding costs, time and quality of services.

Module Structure

- **Module developed in collaboration with experts**

Representing both large and small medium sized companies from the offshore wind industry.

- **Professional application**

Real-life business case-based teaching

- **Flexibility**

2 x two-days-workshop and self-study before and between the workshops

Practical Details

Two face-to-face workshops with participants from all over Europe working in the Offshore Wind Industry will be conducted in Hamburg.

Information about the registration deadline and the dates of the workshops are available at <https://owemba.com/information/>
